Dear students,

On 20.04.2020, the HfM Dresden has started to open the university step by step, first of all for practice. In a second step, we plan to open the university to all students who need a practice room from 27.04.2020. In so doing, the university management seeks to take into account the fact that not all students have the necessary practice facilities available at home.

First of all, we would like to expressly request that those students who have other practice facilities continue to use them. It is essential that no more people than absolutely necessary remain at the university. The following still applies: Please adhere to the following rules. If these rules are not followed, practice will be discontinued.

The university is open from Monday to Saturday from 8 am to 8 pm. Admission exclusively via the old building. It is compulsory to wear mouth and nose protection. Within the university, you may only move around when wearing an appropriate mask – the sole exception to this being when using the practice room.

The practice duration is two hours. Before the practice room is used by another student, the room must be closed for 30 minutes and professionally cleaned. Your name, the room and the time of use will be documented by the gate staff. This data will be kept for 14 days. With this letter, we would like to point out once again that you are obliged to report any potential coronavirus infection to the university immediately after you have tested positive.

You are solely responsible for protecting your own health! The university may only be entered for practice. You must leave the university immediately after practising.

We hope that we can continue to count on your cooperation and compliance with the strict regulations and thank you for your cooperation and understanding.

With best regards and best wishes for your health,

Your university administration
